Word from the founders

Christophe Navarro, Chairman Univet Nature, at the African Giraffe Conservation Center

The Raffle of Hope for Wild Animals is part of a lucid and optimistic approach. Lucid because the climate crisis and the collapse of non-human living fuel humanitarian and health crises, socio-economic and geopolitical disorders. Faced with this deadly cascade of crises, the human institutions seem incapable to act upstream, on ecological causes, with the necessary will and energy. Optimistic because we, Civil Society, are millions to be able to act effectively, provided we avoid the two pitfalls leading to non-action: the pitfall linked to the crisis of confidence: "I don't know how associations will use my money", and the pitfall of turning in on oneself: "The world is falling apart, but I can still please - but I can still get away with it".

Buy Raffle of Hope for Wild Animals tickets, it means acting and believe in the future. All of the profits of the Raffle (85% of the proceeds) will be donated to exemplary associations mobilized for wild animals, forests and the oceans and for human populations that depend on these ecosystems. Promote the Raffle around you is also very important, that's why we also offer the Challenge of the best participants.

Thank you for your commitment !

Christophe Navarro,
Univet Nature Chairman
DVM

Alain Moussu,
Univet Nature Director

Veterinarian providing care to a Peregrine Falcon

Univet Nature, because **every life matters**

Univet Nature is an endowment fund created in 2018 by veterinarians and ecologists to provide financial support to nature protection associations. These associations are chosen according to their projects, commitment and probity of their leaders. They work for the mostly in the tropics where are the maximum of stakes and threats for the biodiversity.

Based on the IUCN Red Lists (International Union for the Conservation of Nature) and on the objectives of the Convention for Biodiversity of the United Nations, Univet Nature participates in reducing mortalities of threatened species (poaching, cetacean-ship collisions etc.) and the destruction of natural spaces (through the acquisitions land), and

finances reforestation actions and environmental education.

These programs are conducted in collaboration with the local populations, and make converge the struggles against poverty and against the destruction of nature. In Madagascar for example, associations recruit guardians who watch over and protect the Lemurs, forests but also rice fields, allowing as many families, sometimes without fixed income, secure their daily lives and the future of their children.

The funds distributed by Univet Nature are all of private origin : donations from individuals, corporate sponsorship, micro-donations, expertises, voluntary carbon offsetting etc.

In 2023, the Raffle of Hope for Wild Animals will be a new and ambitious fundraiser tool : we will sell 60,000 €5 tickets, and 85 % of the recipe will be distributed to associations partners i.e. € 255,000. A large mobilization of the public will be necessary, encouraged by the "Challenge", to succeed in selling all tickets during the period from March 10 to November 15, 2023.

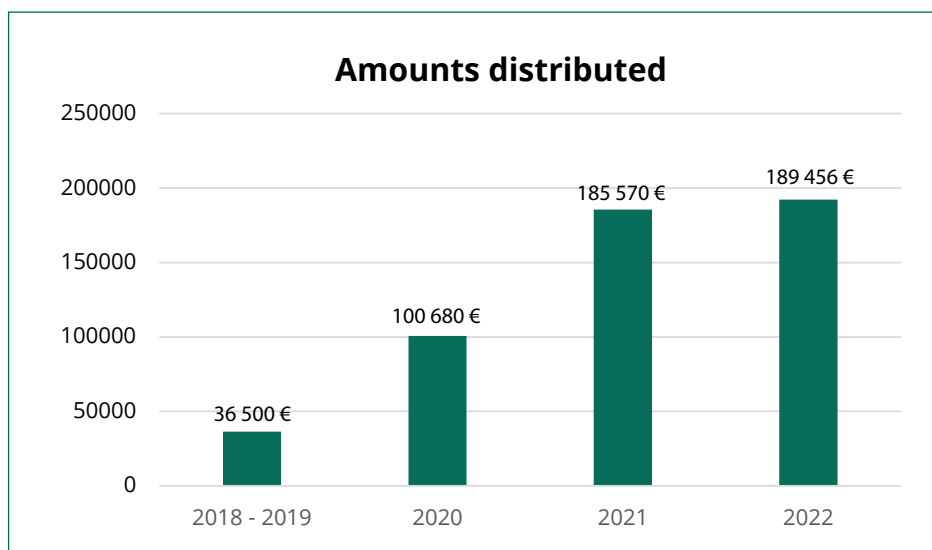

Purchasing a raffle ticket is not a donation, it does not generate a tax receipt. For those who wish, it is of course possible to add a donation to the purchase of raffle tickets.

Because every life matters.

Greater Bamboo Lemur © Benjamin KABOUCHE

In Madagascar, 5 € allows to pay a day of surveillance of a family of Lemurs, thus protected from poaching.

Monarch of Fatu Hiva © Benjamin IGNACE

The Monarch of Fatu Hiva

In critical danger of extinction, with five breeding pairs and a population of less than 20 individuals, it is the most threatened bird in France. This endemic passerine of the small island of Fatu Hiva (Marquises Islands) is threatened by predation by cats and rats. The control of these threats is carried out by the association MANU. In 2022, avian malaria was identified as an additional cause of mortality for chicks in their first days of life. A program to create a captive population has been created, with specialists in this species and in avian malaria. The project still requires funding of 100,000 euros. By purchasing tickets, raffle participants can save a species on the brink of extinction.

The Greater Bamboo Lemur of Madagascar

Lemurs are the most endangered mammals in the world. The French association Helpsimus, led by primatologist Delphine Rouillet, works to save a rare lemur from Madagascar, the Greater Bamboo Lemur. Its conservation program is very much involved in the fight against poverty, allowing the Ranomafana region to be the only one where the populations of Greater Bamboo Lemurs are increasing.

Greater Bamboo Lemur © F. PERROUX

A Raffle for lemurs and Malagasy populations :

- ▶ by enabling local communities in Madagascar to live and work in a preserved forest environment ;
- ▶ by preserving a mosaic of agricultural land, bamboo forests and forest fragments ;
- ▶ by directly financing the sustainability of rice fields and the operation of several school canteens ;
- ▶ by recruiting people without official employment for environmental education and the monitoring of lemurs and trees.

HELPSIMUS creates the conditions to fight against poverty and stop the destruction of natural environments and the poaching of lemurs.

Hawksbill Sea Turtle © Rickard ZERPE CC BY 2.0

Sea turtles and forests in Sumatra

On the island of Sumatra in Indonesia, the French association Rimba leads a program of reforestation, beach cleaning and recycling of plastics, and implements responsible tourism.

With Univet Nature, it has also started a program to acquire plots of secondary forests, on the outskirts of the Muaro Duo Reserve, in order to limit illegal logging and wildlife poaching. In addition, monitoring the beaches of Marak Island, where Hawksbill Sea Turtles, one of the most endangered species of sea turtles in the world, lay their eggs, helps protect the eggs from predators and poaching.

A Raffle for the tropical forests of Indonesia :

- ▶ by organizing the surveillance of the beaches of the island of Marak in Sumatra (Indonesia) to prevent the destruction of nesting sea turtles ;
- ▶ by preserving the Muaro Duo Forest Nature Reserve (400 Ha) from illegal logging and poaching ;
- ▶ by acquiring plots of forest on the outskirts of the Reserve to increase the total protected area and create a buffer zone with nearby human activities ;
- ▶ by initiating English and computer lessons for the children of the village adjacent to the Reserve, as well as actions of environmental education and recycling of plastics ;
- ▶ by preparing the creation of a nursery for reforestation and a program of nesting boxes for the hornbills, prestigious fruit-eating birds of these forests.

RIMBA creates the conditions to reconcile the Minang populations of Sumatra with their living environment, and allow their children to have the best chance of living with dignity.

The elephants of Laos

Laos, the country of the “million elephants” has only 800 pachyderms left. The French association Des Eléphants et Des Hommes conducts forest protection, awareness and education programs as well as the return to the wild of elephants. Univet Nature supports the creation of a brigade of forest guards mounted on elephant back, in the protected national reserve of Nam Pouy, in order to fight against illegal logging.

Common Crane

The Common Cranes of the Semois meadows

Natagora is a Belgian association specialized in the creation and management of nature reserves. In the Semois basin, the Breuvanne and Plate sous les Monts reserves are important refuge areas within an ecological network of inestimable value. The project led by Natagora is a 24 ha extension of the Breuvanne reserve: the acquisition and protection of this space will ensure greater security for wildlife in the area. This aspect is important, in particular for the role the site plays as a staging area for Common Cranes.

Hermann's and Madagascar's tortoises

The SOPTOM center in Madagascar aims to study and protect Radiated Tortoises. The park extends over 35 hectares, in order to accommodate these animals seized during trafficking.

Under the coordination of Franck Bonin, veterinarian, they are cared for and identified before to be released with the agreement of the Malagasy government.

In the Var (France), SOPTOM is leading a program to reintroduce the Hermann's Tortoise made necessary by the consequences of the fire in the summer of 2021.

RAFFLE

of hope

FOR WILD ANIMALS

100 PRIZES & 50 REWARDS

100 Prizes for a Raffle

The Prizes of the Raffle of Hope for the Wild Animals want to promote encounters with the beauty and diversity of life. Observe nature and animals, near my home or in distant latitudes, is very often the first step in engagement volunteer and donor. The Prizes, such as Challenge Rewards (next page), are therefore designed as an extension of the action financed by the Raffle.

The first category of Prizes are the trips organized by Escursia, a specialist engaged in naturalistic journeys. Half of the journeys offered is by train, and the Raffle winners are free to choose in the Escursia catalog.

The second category of Prizes are items offered to choose from the catalog of the LPO store (League for the Protection of Birds),

including a wide selection of nesting boxes, feeders, optical equipment and books.

The Tombola has 100 Prizes, a total value of € 31,025.

- ▶ **1st Prize:** an Escursia gift voucher for € 10,000.
- ▶ **2nd Prize:** an Escursia gift voucher for € 5,000.
- ▶ **From the 3rd to the 5th Prize:** 3 Escursia gift vouchers € 1,000 each.
- ▶ **From the 6th to the 27th Prize:** 22 LPO gift vouchers € 400 each.
- ▶ **From the 28th to the 59th Prize:** 32 LPO gift vouchers € 100 each.
- ▶ **From the 60th to the 100th Prize:** 41 LPO gift vouchers € 25 each.

50 Rewards for a Raffle

There will be individual Rewards for the natural persons most involved in the sale of Raffle tickets, those whose Challenger number will appear on the greatest number of tickets. To participate in the Challenge, you must therefore request a Challenger number (see Your Contacts page 14). It is this number that you will communicate to your Supporters, and that they will enter when buying their Raffle tickets.

«Dad, Mum, dear friends: I don't want any gift for my birthday. In place, I suggest you buy raffle tickets from Univet Nature and register my number of Challenge on your purchase form. You will support a good cause, you will be able to win a trip, maybe you'll make me win the Challenge. ».

The Challenge has 50 Rewards, with a total value of € 7,825.

- ▶ **1st Reward** : an Escursia gift voucher for €3,000.
- ▶ **2nd Reward** : an Escursia gift voucher for €1,000.
- ▶ **From the 3rd to the 7th Reward** : 5 LPO gift vouchers €400 each.
- ▶ **From the 8th to the 17th Reward** : 10 LPO gift vouchers €100 each.
- ▶ **From the 18th to the 50th Reward** : 33 LPO gift vouchers €25 each.
